

# VMware Capacity Planner: Installing the Data Manager

## Overview

This brief, self-paced e-learning module uses lectures to help you quickly understand, install, and configure Capacity Planner in customer environments. This course will also help you avoid some of the most common mistakes made by those new to Capacity Planner.

*Important Note:* This supplementary online training session allows you to only assist in conducting a virtualization assessment. Only those who have successfully completed the two day instructor-led VMware Capacity Planner course are entitled to conduct/request assessment engagements (Company ID) or receive VMware technical support.

## Course Objectives

At the end of the course, you should be able to:

- Explain Capacity Planner's modular architecture
- Obtain the software for Capacity Planner Data Manager
- Install Capacity Planner Data Manager
- Configure the Discover, Inventory, Performance, and Data Synchronization modules

## Target Audience

Consultants and technical staff tasked with installing the VMware Capacity Planner Data Manager. **This recording is restricted to VMware Employees and authorized VMware Partners.**

## Suggested Prerequisites

System administration experience on Microsoft Windows servers.

## Pricing and Scope

- 1 hour of self-paced training
- 100% lecture
- Individual enrollment at [www.vmware.com/education](http://www.vmware.com/education)
- Contact your VMware representative for pricing

## Course Outline

### Module 1: Installing the Capacity Planner Data Manager

- Installing Capacity Planner
- Introduction to Configuring Modules
- Populating Capacity Planner with Servers
- Collecting Inventory
- Collecting Performance Data
- Uploading the Data
