Course Overview

This two-day course provides insight into the challenges of enterprise mobility and how VMware AirWatch® can help you solve those challenges. You will gain a comprehensive view of all VMware AirWatch® Enterprise Mobility Management™ solutions and key device platforms, as well as an overview of VMware AirWatch architecture. This course provides the foundational skills necessary to manage the VMware AirWatch platform.

Course Objectives

By the end of the course, you should be able to meet the following objectives:

- Enroll devices in your enterprise environment, configure and update device settings over the air, and secure a diverse fleet of mobile devices
- Select the email deployment strategy that best fits your business and security requirements
- Manage internal, public, and purchased applications across managed devices
- Enable secure mobile access to content anytime, anywhere, while protecting sensitive content
- Gain insight into major platforms, including iOS and Android

Target Audience

VMware AirWatch administrators, IT staff, sales engineers, consultants, support and helpdesk personnel, solutions architects, solutions engineers, and VMware AirWatch installers and implementation specialists

Prerequisites

None

Course Delivery Options

- Classroom
