VMware Workspace ONE: Advanced Integration

Course Overview
In this five-day course, you build on the foundations learned in VMWare Workspace ONE: Deploy & Manage [21.x] to accelerate the advancement of your deployment and management systems with VMware Workspace ONE® UEM and VMware Workspace ONE® Access™.

Through a series of hands-on labs, simulations, and interactive lectures, you effectively evaluate your organization’s current practices and discover opportunities to target improvements in identity, authentication, and access management. Additionally, you learn the strategies and techniques necessary to construct an integrated management strategy, utilizing a comprehensive set of VMware Workspace ONE® services, including Hub Services, the Unified Catalog, Intelligence, and the API.

Course Objectives
By the end of the course, you should be able to meet the following objectives:

• Given the most common use cases and workflows of Workspace ONE Access, identify key benefits of Workspace ONE Access to address your specific use case
• Describe different identity sources supported by Workspace ONE Access and apply the most appropriate solution to your organization’s use case
• Differentiate common authentication methods in Workspace ONE Access and choose the most suitable authentication methods to fit your business needs
• Illustrate how to use access policies and implement best practices within your organization
• Outline various authentication methods and workflows that can be implemented to ensure a robust end-user experience, while meeting your security requirements
• Summarize the capabilities and benefits of VMware Workspace ONE® Intelligent Hub and Hub services and learn how to effectively implement both
• Describe features of VMware Workspace ONE® Intelligence™ and how to use it to support daily administration and maintenance
• Explain how to use the Workspace ONE UEM and Workspace ONE Access APIs to perform administration and maintenance

Target Audience
• Workspace ONE UEM operators and administrators, account managers, solutions architects, solutions engineers, sales engineers, and consultants
• Workspace ONE Access operators and administrators, account managers, solutions architects, solutions engineers, sales engineers, and consultants
Prerequisites
Before taking this course, you should have completed the following course:
- **VMware Workspace ONE: Deploy and Manage**

Course Delivery Options
- Classroom
- Live Online
- **Private Training**

Product Alignment
- VMware Workspace ONE UEM
- VMware Workspace ONE Intelligence
- VMware Workspace ONE Access
- VMware Carbon Black
- VMware Horizon®
- VMware Horizon® Cloud Service™
- VMware Horizon® Cloud Service™ on Microsoft Azure
Course Modules

1 Course Introduction
- Introduction and course logistics
- Course objectives

2 Workspace ONE Platform Overview
- Identify key capabilities of different products included in the Workspace ONE platform based on use cases
- Given the most common use cases and workflows of Workspace ONE Access, identify key benefits of Workspace ONE Access in addressing your specific use case
- Explain the underlying components of the primary Workspace ONE Access services to identify approaches specific to your organization’s unique needs and requirements
- Identify the features and workflows of the Workspace ONE Access connector

3 Identity Sources
- Identify different identity sources supported by Workspace ONE Access and apply the most appropriate solution to your organization’s use case
- Identify different directory types based on identity sources
- Outline the steps to integrating Microsoft 365 with Workspace ONE Access to provide SSO capabilities
- List various workflows of Active directory and LDAP directory synchronization services
- Identify features and use cases of 3rd party identity provider integrations with Workspace ONE Access
- Identify the features and use cases of the VMware AirWatch® Provisioning App

4 Authentication
- Identify different types of authentication methods supported by Workspace ONE
- Summarize the Okta Integration options
- Describe the workflow of connector-based authentication methods

5 Access Policies
- Outline the workflow of common cloud-based authentication methods
- Summarize using conditional access policies to provide additional layers of security
- Describe how identity providers and authentication methods work in conjunction with access policies
- Explain how to create access policy rules according to best practices

6 Catalog
- Outline supported resources in the Unified Catalog according to use case
- Describe the workflows of the supported delegated and federated authentication mechanism
- Configure Web Application access and SSO capabilities according to use case
- Describe common virtual desktop infrastructure integration use cases

7 Hub Services
- Describe the relationship of Hub services, Workspace Intelligent Hub, Workspace ONE UEM, and Workspace ONE Access
- Illustrate different components of Hub services and summarize configuration steps
- Explain how to implement VMware Workspace ONE® Verify
- Explain how to implement Mobile flows according to use case

8 Intelligence
- Recognize the features and benefits of VMware Horizon
- Explain how integration works to connect and share data with 3rd party solutions
- Explain how Dashboards can be created to access and review collected data and metrics
- Create Workspace ONE Intelligence automations to perform various administrative tasks
- Create Workspace ONE Intelligence reports to obtain in-depth analytics across your environment

VMware warrants that it will perform these workshop services in a reasonable manner using generally accepted industry standards and practices. THE EXPRESS WARRANTY SET FORTH IS IN LIEU OF ALL OTHER WARRANTIES, EXPRESS, IMPLIED, STATUTORY OR OTHERWISE INCLUDING IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE WITH RESPECT TO THE SERVICES AND DELIVERABLES PROVIDED BY VMWARE, OR AS TO THE RESULTS WHICH MAY BE OBTAINED THEREFROM. VMWARE WILL NOT BE LIABLE FOR ANY THIRD PARTY SERVICES OR PRODUCTS IDENTIFIED OR REFERRED TO CUSTOMER. All materials included in this workshop are copyrighted by VMware (“Workshop Materials”). VMware grants the customer of this workshop a license to use and make reasonable copies of any Workshop Materials strictly for the purpose of facilitating such company’s internal understanding, utilization, and operation of its licensed VMware product(s). Except as set forth expressly in the sentence above, there is no transfer of any intellectual property rights or any other license granted under the terms of this workshop. If you are located in the United States, the VMware contracting entity for the service will be VMware, Inc., and if outside of the United States, the VMware contracting entity will be VMware International Limited.
9 Workspace ONE Application Programming Interface

- Outline the use cases of using the Workspace ONE UEM and Workspace ONE Access APIs
- Perform general Workspace ONE UEM console administration and maintenance through the API
- Perform general Workspace ONE Access console administration and maintenance through the API
